### INTRODUCTION

The Board is pleased to report that the business operations posted encouraging growth and commendable results in the half year under review, including the contribution of Genop, acquired on 1 January 2018. Each of the business units posted solid performance, achieving good growth in turnover, with disciplined cost control, yielding growth in trading profits across the board.

The results were achieved against a background of a price-regulated environment, coupled with tough trading conditions, reflected in the continued pressure on the consumer due to the macro-economic environment. The Group's diversified portfolio remained resilient with growth in market share, with continued relentless focus on customer service and product quality.

## FINANCIAL PERFORMANCE

### **TURNOVER AND PROFITS**

Turnover during the period under review increased by 15.6% to R3,595 million (December 2017: R3,108 million), benefiting from the inclusion of Genop from 1 January 2018. On a like-for-like basis (excluding Genop), turnover increased by 7.4%, supported by an increase in volume of 5.0%, with mix and price contributing the balance. Price increases were realised in the Consumer segment, but offset to a large extent by price reductions in the other segments due to competitive market conditions and pressure from Funders to lower prices of certain Prescription medicines.

The gross margin improvement from 38.0% to 38.7% was driven by an advantageous sales mix and improved throughput at the Clayville factory.

Total operating expenses increased by 18.4%, but excluding Genop, were well controlled and only increased by 6.2%, resulting in a 16.6% improvement in trading profit to R485.5 million (December 2017: R416.3 million).

### **NON-TRADING EXPENSES**

Non-trading expenses of R28.5 million include share-based expenses of R19.4 million, an impairment of the associate investment in Ghana (Ayrton Drug Manufacturing Limited) of R5.8 million and corporate activity costs of R3.3 million.

#### **NET FINANCE COSTS AND HEADLINE EARNINGS**

Net finance costs of R8.5 million were incurred in the period, compared to net finance income of R0.7 million in the prior period and are reflective of the decrease in cash resources after the Genop acquisition in the previous financial year.

Headline earnings from continuing operations for the period under review increased to R361.2 million (December 2017: R310.3 million). This translates into headline earnings per share from continuing operations of 217.2 cents (December 2017: 186.6 cents), an increase of 16.4%.

### **CASH FLOWS**

Cash generated from operations amounted to R328.6 million (December 2017: R455.9 million) after working capital increased by R253.2 million (December 2017: R85.7 million). Trade and other payables have decreased by R211.4 million since June 2018, which was partially offset by a decrease in inventories (R109.6 million) as the stock holding from certain multinational partners has decreased. Trade and other receivables have increased by R151.4 million, with the festive season having delayed some receipts. The Group had net cash resources of R109.1 million at the end of the period (June 2018: R155.7 million).

## **DIVIDEND DISTRIBUTION**

The Board has declared an interim dividend of 100 cents per share for the six-month period ended 31 December 2018, out of income reserves, an improvement of 16% over the comparable period.

### **BUSINESS OVERVIEW**

**OTC** turnover improved by 4.9% over the prior comparative period to R1,019 million (December 2017: R970.7 million), driven by improved volumes. This is a satisfactory performance given the depressed consumer trading environment and difficulty in obtaining export permits from SAHPRA. A number of the top brands including Allergex, Corenza C and Citro-Soda showed double-digit growth.

A gross margin improvement was realised in comparison to the prior comparative period, driven by an advantageous sales mix and better recoveries in the Clayville factory. As a result, trading profit increased by 19.7% to R216.7 million (December 2017: R181.1 million).

**Prescription** turnover improved 33.5% to R1,364 million (December 2017: R1,021 million) aided by the acquisition of Genop which contributed R257 million. Volumes increased by 5.9% due to an excellent ARV performance, driven by Trivenz in the private market, compensating for a price decrease of 2.5% as a result of the reduction of reference pricing of certain generic products by funders. Mix contributed to the balance, with the introduction of new products. This division achieved double digit growth in the total private market as measured by IQVIA.

Gross margin is slightly lower compared to the prior comparative period, with a change in sales mix compensating largely for the erosion in certain selling prices and Rand weakness which impacted unfavourably on imported raw materials and finished goods. As a result, trading profit of R150.2 million is 13.4% ahead of the comparative period of R132.5 million.

**Consumer** turnover increased by 6.4% to R393.3 million (December 2017: R369.5 million) with key brands posting healthy growth. An average price increase of 4.1% was achieved with volumes only increasing 2.0%, indicative of the pressure on the consumer. Notwithstanding an increasingly competitive environment and with good cost control, trading profits increased by 12.6% to R65.8 million (December 2017: R58.4 million).

**Hospital** turnover improved by 11.4% to R764.4 million (December 2017: R686.4 million) with all product categories achieving growth. Increased volumes contributed 10.1% and mix 2.5%, which compensated for the loss in price. A gross margin improvement was realised, driven by the advantageous sales mix. Trading profits improved by 25.9% to R51.2 million (December 2017: R40.6 million) with very disciplined control of operating expenditure.

#### **REST OF AFRICA**

Following the Board's decision to dispose of the Group's Zimbabwean operating subsidiary, this operation has been treated as an asset held-for-sale and is reflected in the financial statements as a discontinued operation. As of 30 November 2018, amortisation and depreciation of assets in this subsidiary were accordingly suspended.

In Kenya turnover declined by 7.3% to R30.5 million (December 2017: R32.9 million), but the business still achieved a trading profit R1.6 million during the period under review (December 2017: R0.9 million).

### **CHANGES TO THE BOARD**

On 21 November 2018, Mr Mpho Makwana resigned as a non-executive Director, a member of the HR, Remuneration and Nominations Committee and Chairman of the Social, Ethics and Transformation Committee. Dr Tlalane Lesoli retired by rotation from the board and did not make herself available for re-election as a Director at the Annual General Meeting, held on 22 November 2018, after having served for more than nine years. She accordingly, relinquished her position as a Director and a member of the Social, Ethics and Transformation Committee. The process to fill the vacancies on the Board is currently underway.

### **PROSPECTS**

Trading conditions are expected to remain challenging, particularly in the Consumer and OTC environment. The low Single Exit Price (SEP) increases granted to the industry in March 2018 of 1.26% and 3.78% in the current calendar year, do not compensate for the above inflationary increases in salaries, wages and utilities. Against this background the Group is focused on improving its operational efficiency, growing the established brands and expanding its product range through the acquisition of non-regulated brands to defend its position in the market.

Adcock Ingram is delighted it has been successful in winning a number of key products within the ARV tender and was awarded a 12% share of the overall tender, equating to approximately R1.8 billion (excluding VAT) to supply ARV drugs to state-run hospitals, over a period of three years, effective from 1 July 2019. Adcock Ingram's share of the ARV Tender award over the three years includes 11% (16.8 million packs) of the 147 million packs of DLT requested in the tender, 2.8 million packs of other oral solid dosage products and 2.7 million bottles of oral solutions.

As a member of Proudly South African, Adcock Ingram has its roots firmly entrenched in the South African market. We are proud to be a leading South African manufacturer, which has been recognised as a partner of the State in the national fight against HIV and AIDS. The tender award reflects positively on our manufacturing capability, breadth of our product offering and our historical service delivery levels.

## **DIVIDEND DISTRIBUTION**

The Board has declared an interim gross dividend out of income reserves of 100 cents per share in respect of the six months ended 31 December 2018. The South African dividend tax ("DT") rate is 20% and the net dividend payable to shareholders who are not exempt from DT is 80 cents per share. Adcock Ingram currently has 175 748 048 ordinary shares in issue of which 149 905 089 qualify for ordinary dividends. The income tax reference number is 9528/919/15/3.

The salient dates for the distribution are detailed below:

Last date to trade cum distributionTuesday, 12 March 2019Shares trade ex distributionWednesday, 13 March 2019Record dateFriday, 15 March 2019Payment dateMonday, 18 March 2019

Share certificates may not be dematerialised or rematerialised between Wednesday, 13 March 2019 and Friday, 15 March 2019, both dates inclusive.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

# **1** BASIS OF PREPARATION

#### 1.1 INTRODUCTION

The summarised unaudited interim results for the six months ended 31 December 2018 have been prepared in compliance with the Listings Requirements of the JSE Limited, International Financial Reporting Standards (IFRS), the requirements of the International Accounting Standards (IAS) 34: Interim financial reporting, SAICA Financial Reporting Guidelines as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council and the Companies Act, No. 71 of 2008. The Board of directors take full responsibility for the set of financial results which have been prepared by Ms Dorette Neethling, Chief Financial Officer.

### 1.2 CHANGES IN ACCOUNTING POLICIES

The accounting policies adopted are consistent with those of the previous financial year except for the adoption of the following new and amended IFRS standards and interpretations during the period, which did not have a significant impact on the financial performance or position of the Group:

IFRS 9: Financial instruments – recognition and measurement

*IFRS 9* is the new financial instrument accounting standard and includes the requirements for classification and measurement of financial assets, the impairment and derecognition of financial assets, as well as general hedge accounting.

The classification and measurement of the Group's financial assets are substantially the same as under IAS 39, except for:

- the reclassification of the long-term receivable from the Black Managers Share Trust, from amortised cost to fair value through profit or loss; and
- the measurement of the impairment provision for trade receivables.

In measuring the provision for trade receivables, the Group has applied the new rules using the modified retrospective approach, whereby the financial statements are retrospectively adjusted and the cumulative impact (a reduction of R6.1 million of net trade receivables) was recorded on 1 July 2018, the initial date of implementing the standard, by recognising an adjustment to opening retained earnings. A simplified impairment approach was used, whereby the lifetime expected losses on trade receivables are recorded immediately.

The Group has chosen to continue to apply the hedge accounting requirements of IAS 39, instead of the requirements in IFRS 9, to all of its hedging relationships.

IFRS 15: Revenue from contracts with customers

*IFRS 15* establishes a five-step model for entities to use in accounting for revenue arising from contracts with customers. The new standard is based on the principle that revenue is recognised at an amount that reflects the consideration to which the entity expects to be entitled in exchange for transferring goods or services to a customer. The new standard supersedes all current revenue recognition requirements under IFRS.

The Group adopted IFRS 15 using the retrospective approach, with the following impact on the Group's financial statements:

- · disaggregated revenue disclosure; and
- liabilities for the non-performance on customer contracts will be recognised against revenue.

<sup>(1)</sup> Level 3. The value of the investment in Group Risk Holdings Proprietary Limited is based on Adcock Ingram's proportionate share of the net asset value of the Company.

<sup>(2)</sup> Level 2. Fair value based on the ruling market rate at year-end. The fair value of the forward exchange contract is calculated as the difference in the forward exchange rate of a similar contract with similar terms and maturities concluded as at the valuation date multiplied by the foreign currency monetary units as per the FEC contract.

<sup>(3)</sup> The carrying value approximates fair value.

#### FORWARD-LOOKING STATEMENTS

Adcock Ingram may, in this document, make certain statements that are not historical facts and relate to analyses and other information which are based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to our future prospects, developments and business strategies. Examples of such forward-looking statements include, but are not limited to, statements regarding exchange rate fluctuations, volume growth, increases in market share, total shareholder return and cost reductions. Words such as "believe", "anticipate", "expect", "intend", "seek", "will", "plan", "could", "may", "endeavour" and "project" and similar expressions are intended to identify such forward-looking statements, but are not the exclusive means of identifying such statements. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and there are risks that the predictions, forecasts, projections and other forward-looking statements will not be achieved. If one or more of these risks materialise, or should underlying assumptions prove incorrect, our actual results may differ materially from those anticipated. Forward-looking statements apply only as of the date on which they are made, and we do not undertake any obligation to update or revise any of them, whether as a result of new information, future events or otherwise
